; If you wish to have an extension loaded automatically, use the following
; syntax:
```

```
; extension=modulename
```

```
; For example:
```

```
; extension=mysqli
```

```
; When the extension library to load is not located in the default extension
; directory, You may specify an absolute path to the library file:
```

```
; extension=/path/to/extension/mysqli.so
```

```
; Note : The syntax used in previous PHP versions ('extension=<ext>.so' and
; 'extension='php_<ext>.dll') is supported for legacy reasons and may be
; deprecated in a future PHP major version. So, when it is possible, please
; move to the new ('extension=<ext>') syntax.
```

```
; Notes for Windows environments :
```

```
; - Many DLL files are located in the ext/
